Professional Summary

Junior Frontend Developer and self-taught programmer with approximately three years of hands-on learning and project-based experience. Passionate about building modern, user-friendly web applications using contemporary frontend technologies. Highly motivated to grow into a Mid-Level Frontend Developer by contributing to real-world products in collaborative, remote-friendly teams.

Core: TypeScript · React · Next.js · App-router · SSR/SSG/ISR · React Query · Zod · Zustand · ReduxToolkit · Context API · React Hook Form · REST API integration · MongoDB (basic CRUD operations) · Git & GitHub (version control) · Tailwindcss · Shadcn · Problem-Solving · Learner

Highlighted Projects

Jira Clone – Full-Stack Project: Built a full-stack Jira clone with workspaces, projects/epics, tasks, Kanban boards, calendars, analytics, and role-based access control.

Developed using **Next.js 14**, **Hono.js API**, **Appwrite**, **TypeScript**, **TailwindCSS**, and **Shadcn UI**, with secure authentication and image uploads. Implemented advanced search, responsive UI, real-time project management features, and scalable architecture.

Live Demo: <https://jira-clone-next-henna.vercel.app/>

GitHub: <https://github.com/zhale-el/jira-clone-next>

Finance SaaS Platform – Full-Stack Project: Built a finance SaaS platform to track income and expenses, manage accounts, categorize transactions, and import data via CSV or bank connections using Plaid.

Implemented interactive dashboards, advanced filtering, bulk actions, premium subscriptions with Lemon Squeezy, and secure authentication via Clerk.

Developed with **Next.js 14**, **Hono.js**, **PostgreSQL**, **Drizzle ORM**, **TanStack React Query**, **TailwindCSS**, and **Shadcn UI**.

Live Demo: <https://saas-nextjs-pied.vercel.app/>

GitHub: <https://github.com/zhale-el/saas-nextjs>

Lingo – Language Learning SaaS Platform: Built a Duolingo-inspired language learning platform where users can choose courses, complete interactive lessons with audio-visual effects, earn XP/points, manage hearts, and track progress.

Implemented AI-generated voices via ElevenLabs, gamification features (leaderboards, quests, shop), subscription-based Pro tier with **Stripe**, and secure authentication via Clerk. Developed with **Next.js 14**, **Drizzle ORM**, **PostgreSQL**, **TailwindCSS**, **Shadcn UI**.
